This report represents BREAST CANCER OUTREACH FOUNDATION INC's responses to Charting Impact, a joint project of BBB Wise Giving Alliance, GuideStar USA Inc, and Independent Sector. Charting Impact uses five simple yet powerful questions to encourage strategic thinking and help organizations share concise information about their plans and progress toward impact.

BREAST CANCER OUTREACH FOUNDATION INC
1613 E Livingston St Suite 201, Orlando, FL 32803
www.breastcanceroutreach.com

Mission:
We provide funding for Breast Cancer research, diagnostic testing equipment, treatment, and recurrence prevention in the United States and World-wide! Recently we have provided pharmaceuticals for hospitals in poor countries in the Caribbean, Central America and West Africa and supported vaccine research at the Cleveland Clinic in Ohio and the San Antonio Military Medical Center in Texas.
1. What are we aiming to accomplish?
We will fund two independent breast cancer research projects to obtain a vaccine by 2018 and ship $3 million in medical equipment and medicine to screen and treat breast cancer patients world-wide in 2015.

2. What are our strategies for making this happen?
We are seeking donations from the public, with a private fund raiser and private fund raising counsel, as well as donations from viewers on this website. We are also seeking public grant moneys and in-kind donations from hospitals and drug manufacturers, of their surplus inventories of medications.

3. What are our organization's capabilities for doing this?
We are working with the Universal Aide Society of Canada and Charity Services International, of Ft. Mill, SC to obtain gifts-in-kind of medical equipment and medicine. We are working with Courtesy Call, Inc. of Las Vegas, NV and Newport Creative, Inc. of Duxbury, MA to raise funds.

4. How will we know if we're making progress?
Our audited financial statements and IRS form 990s will show growth and financial improvement for us on an annual basis. In addition we receive feedback and daily heartwarming letters of thanks from individuals who have been screened and treated for breast cancer, and those who have received medication to build their immune system following treatment.

5. What have and haven't we accomplished so far?
We are planning another shipment of breast cancer medicine in the 2d or 3d quarter of 2015 and expect to have donations to cover this. We expect to arrange another transfer of film type mammography equipment to Sierra Leone, Africa or another country in need in the 3d quarter of 2015.
