To Whom It May Concern:

Our school is delighted to be participating with the educational non-profit Guitars in the Classroom. This year, the arts education organization trained teachers from our music, special education and general education faculty to play ukulele, sing, write songs for learning, and to teach literacy skills through the power of song. The program has been a blessing!

We are grateful for your consideration of their grant application. It is our goal to make music a more vital part of learning for every student by providing more sequential training for our faculty members. Our school would be glad to welcome teachers from other schools in the district to train with GITC here at Sunrise Elementary.

We would be very grateful to the El Pomar Foundation for the support that can make music a reality for students in our school and our district.

Thank you very much,

Chris Hardy
Principal
