2022 S.M.A.R.T Goals

1. Launch a new Classroom-based delivery mode for the Progressive Agriculture Safety Day® program during the 2022-2023 academic school year.

2. Promote and foster partnerships with various youth organizations through the development of tools and resources to support peer-to-peer engagement opportunities. The resources will assist middle and high school-aged youth in the delivery of safety and health educational programming geared toward elementary-aged youth.

3. Expand the Progressive Agriculture Safety Day® program’s reach with targeted growth of youth safety and health educational opportunities in the Upper Midwest and Eastern Corn Belt through outreach, marketing, and partnerships in 2022.
