

### Strategic Goals:

Our goals are simple. To continue our animal advocacy and welfare mission. We would love to expand and continue our humane education, including purchasing a vehicle for transporting animals from death row and backyard breeding facilities and to bring animals to schools and education facilities. We would also like to increase our outreach efforts to serve even more impoverished communities with veterinary care and housing for pets in need. We are continuing our large scale seizures of animal hoarding and inhumane puppy mill cruelty.

In 2022 we plan to expand our network of receiving rescues for the hundreds of animal seizures due to neglect and abuse. We have already expanded our reach across the world to help more soldiers and the animals they befriend which has expanded our “No Buddy Left Behind Program”. We cannot cut the costs of this program due to the fees which are out of our control so we will be launching promotions to help expand the program so we never have to say no to a hero in need.
