

Hello,

I wanted to say Thank You! My son Cole has benefited tremendously from this program for the last several years. Cole has been riding since he was toddler and he is now 13 years old. Cole is diagnosed with Cerebral Palsy and Epilepsy along with other conditions. The first lesson Cole had he loved it even though he did not have too much control in his core, he developed it over time. Cole's muscle tone overall improved over time as well. The progress he has made has been in part because of his lessons at Reins. I truly believe without these therapeutic lessons and his determination he wouldn't be as able as he is today. But, most of all he enjoys his time at Reins from his lessons to his interactions with the staff and volunteers. The staff is always helpful and creates a loving and nurturing environment.

Sincerely,
Dena Grindle
