

**GSM's Strategic Plan** - Make our ministry known throughout our three county area, Treasure Coast of Florida, establishing more collaborations with nonprofits that are focused on raising up the low-income individuals that suffer low self-esteem, participate less in social activities and be more likely to experience stress and anxiety. All these things cause them to be easy prey for dependence on alcohol and drugs and their lives really spiraling out of control. Our strategy is to continuously improve our four programs, homeless/substance abuse, Elderly, Mentally Ill and single mom's whose children are at risk to going to foster care. Create the organizational structure with program directors and case managers to bring to bear a healing, a recovery in their lives. Then continuously improve our graduation program that helps them transition from their recovery to leading independent lives back in their community,
