

OUR VISION

A world where all people have equitable access to innovative vaccines and therapeutics

OUR MISSION

Translating scientific discoveries into affordable, globally accessible public health solutions

IAVI will partner, strengthen capacity, and lead programs to:

| | | | | | |
|--------------|--|--|---|--|--|
| Impact Goals |  <p>Build next generation of HIV vaccines for clinical testing Support advancement of next-generation HIV vaccine candidates</p> |  <p>Conduct HIV antibody development and enable access Deliver proof-of-concept data and create a viable pathway to enables affordable, accessible HIV Abs for prevention and cure</p> |  <p>Facilitate TB vaccine development to prevent disease Play a major role in leading TB programs and generate promising next-generation candidates</p> |  <p>Advance a flexible platform for emerging infectious diseases (EID) Deliver efficacy data and have an integrated clinical development plan for one EID product. Advance a flexible manufacturing platform</p> |  <p>Generate proof of concept data in the neglected disease area Generate proof-of-concept, preclinical data and attract sustainable investment for one neglected disease area</p> |
| |  <p>Impact other global health problems Coordinate the Product Development Center as the not-for-profit center of excellence for product development</p> | | | | |

| | | | | |
|----------|---|---|--|--|
| Enablers |  <p>Sustainable resourcing</p> |  <p>Impact-driven talent</p> |  <p>Enabling policies</p> |  <p>Integrated communications</p> |
