To achieve community impact more effectively by creating an enhanced, sustainable food security network with nutrition food equity, we will focus on four key priorities:

**ACCESS**
Optimize locations for emergency food distribution, including use of Forgotten Harvest’s Food Insecurity Index, to serve metro Detroit neighborhoods with the greatest unmet need.

**SUPPLY**
Provide an equitable nutritious mix for guests at partner locations and expand the quantity of food to help address food insecurity for thousands of people in metro Detroit.

**KNOWLEDGE**
Increase acquisition and use of data to identify opportunities, define actions, and evaluate effectiveness, along with qualitative input from our customers.

**HEIGHTENED COMMUNITY AWARENESS**
Enhance collaboration with community partners to address the barriers causing food insecurity and resulting personal stresses.
