To Whom It May Concern:

I am writing to offer my enthusiastic endorsement of Long Arm Mechanics and their Green Light Outreach Program. Through this initiative, they provide essential pro bono labor, making a significant impact in supporting survivors of abuse and families in need.

Faces of Hope Foundation has been proud to partner with Long Arm Mechanics since last year. Their dedicated Green Light Outreach Program has proven to be an invaluable resource for our clients, offering crucial automotive services without imposing a financial burden.

Long Arm Mechanics plays a vital role in our shared mission to empower survivors and provide essential support to those in need. The grants they are seeking will be instrumental in sustaining the Green Light Outreach Program, ensuring it continues to be a beacon of hope for our clients.

Their collaborative efforts with programs like Navigation and the Boise Fire Department further demonstrate their steadfast commitment to providing vital services. In the words of our case managers:

"Long Arm Mechanics has been a game-changer for our clients. Their Green Light Outreach Program provides a lifeline for survivors of abuse, ensuring they have access to essential automotive services without the financial burden. This support is invaluable in helping our clients regain independence and stability in their lives." - Ella Johnson

Long Arm Mechanics is not just a service provider; they are a pillar of support for survivors and families in need. We firmly believe that the grants they seek will not only sustain their important work but also fortify the stability of their business, leading to even greater benefits for the families they serve.

Thank you for considering this exceptional organization. Please feel free to contact me for further information or clarification.

Warm regards,

Lauren Atwood
Program Manager
